

GOOGLE SCHOLAR: LINKING TO NMIT ONLINE RESOURCES

TE PUNA MĀTAURANGA - LIBRARY LEARNING CENTRE

You can set up your Google Scholar to link to full text online resources provided by NMIT.

1. Open [Google Scholar \(https://scholar.google.com\)](https://scholar.google.com) and click on the pancake menu at top left.

2. From the drop-down menu, select **Settings**.

3. From the **Settings** options, click on the **Library links** tab.

4. In the search box under **Show library access links for (choose up to five libraries)**, type **nmit** and then press Enter or click on the magnifying glass to search.

The screenshot shows a search interface with the heading "Show library access links for (choose up to five libraries):". Below the heading is a search input field containing the text "nmit". To the right of the input field is a blue search button with a magnifying glass icon. Below the input field, there is a small example text "e.g., Harvard".

5. A list of libraries will appear. Tick in the box beside **NMIT | Te Pūkenga (Nelson Marlborough Institute of Technology) - NMIT Fulltext** and click on the 'Save' button.

The screenshot shows a search results page with a sidebar on the left containing links for "Search results", "Languages", "Library links", "Account", and "Button". The main content area has the heading "Show library access links for (choose up to five libraries):". Below this is a search input field with "nmit" and a search button. A list of libraries is shown below, with "Melbourne Polytechnic - FindIt@" and "NMIT | Te Pūkenga (Nelson Marlborough Institute of Technology) - NMIT Fulltext". The checkbox for "NMIT | Te Pūkenga" is checked and highlighted with a yellow circle. Below the list is a paragraph of text: "Online access to library subscriptions is usually restricted to patrons of that library. You may need to login with your library password, use a campus computer, or configure your browser to use a library proxy. Please visit your library's website or ask a local librarian for assistance." At the bottom right, there are "Save" and "Cancel" buttons. A note at the bottom right says "To retain settings, you must turn on cookies".

6. Now when you search Google Scholar, you will see a clickable '**NMIT Fulltext**' link next to articles in your search results when NMIT has full text online access.

The screenshot shows a Google Scholar search result for "Nursing interventions for smoking cessation" by "VH Rice, LF Stead - Cochrane database of systematic reviews, 2008 - cochranelibrary.com". The abstract text is partially visible: "... Nine studies comparing different nurse-delivered interventions failed to detect significant benefit from using additional components. Five studies of nurse counselling on smoking ...". At the bottom left, there are links for "Save", "Cite", "Cited by 1297", "Related articles", and "All 16 versions". At the bottom right, there is a yellow circle highlighting a link that says "[PDF] cochranelibrary.com NMIT Fulltext".

7. Log in to your NMIT account first to access the NMIT full text resources, if not logged in already.

TIP

- To save this linking setting permanently, please note that you must turn on cookies (<https://support.google.com/accounts/answer/61416?hl=en>) if they are not turned on already.
